25FT BULK LIQUID STORAGE

MPT LIF
ONLY

CF

25ft Bulk Liquid Storage

SCF's 25ft Bulk Liquid Storage tank is designed for small scale metro construction remediation and dewatering projects. Manufactured for reliability, durability and efficiency, they are the ideal on-site storage solution for liquids.

Key Features

- Superior insulation system for temperature sensitive cargoes
- Stair and gantry system for safety
- Internal mixing lines (on certain units)
- 8 inch manifold with 4 x 4' connections
- Front and rear drain valves
- 500mm access hatches
- High flow 300mm breather vent to prevent pressurisation
- 300BBL capacity (37,000L)

Options

- Galvanised steel
- Mounting points for agitators
- Various linings for acid application

Details

SCF has been designing and building 25ft Bulk Liquid Storage tanks for the better part of a decade. Deployed across multiple industries in the last 7 years without any major incidents of loss of containment.

The tanks are suitable for space constrained sites making it ideal for metropolitan construction. The versatility of the unit allows for multiple applications including water treatment and chemical storage.

These tanks are skid-mounted for cost effective, long distance mobilisation to remote sites. The unit is double stackable in loaded configuration which allows you to maximise your storage and minimise your footprint.

All units are fitted with level gauges which allow customers to monitor the filling ratio while units are in use. Tanks are designed to connect together so they can be filled in sequence or as a single, large storage receptacle.

This product range is designed by SCF's in house engineering team. Built strong to endure the harshest conditions, these tanks have been RPEQ certified confirming they meet wind and load ratings and all other regulatory requirements.

Specifications

25ft Bulk Liquid Storage | FR25S

Specifications may vary

External

Weight

Length (mm)	7,620	Tare (kg)	6,200
Width (mm)	2,438	Payload (kg)	63,000
Height (mm)	2,896	MGW (kg)	69,200

Volume

Litres	37,000
m ³	37

Top:
Store up to
37,000L or
300BBL of
liquid on-site.

Middle:
A mixing line
spans the
perimeter of
the tank for
optimal
agitation.

Below:
Ideal for small
scale metro
construction
and
remediation.
